-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2003/0224224. The reference discloses a power supply system having a fuel cell monitoring system 116 for displaying the amount of fuel remaining in the fuel cell. The measurement is taken into account the temperature and pressure differentials. See paragraphs 46 and 47. It is however does not specifically disclose the “charge equivalent” of the fuel cells. It would have been obvious to one having ordinary skill in the art at the time the invention was made to devise the display to show the coulomb charge equivalent of the fuel cells, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

Applicant's arguments with respect to claims 1-50 have been considered but are moot in view of the new ground of rejection. However the argument is not persuasive. The reference might not be explicit on what is being displayed with respect to the fuel cells. It is however

Art Unit: 2838

obvious to show the "potential" of the cells to include its charge equivalent and/or, if the user really wants to know the details, its remaining molecules maybe displayed.

Conclusion
